

AWARD 2014

Tested Software

## Endpoint Security

Company

## Bitdefender

Version Tested

5.3

During the year 2014 corporate endpoint protection products were continuously evaluated in 6 tests using settings as provided by the vendor. We always used the most current publicly-available version of all products for testing. They were allowed to update themselves at any time and query their in-the-cloud services. We focused on realistic test scenarios and challenged the products against real-world threats. Products had to demonstrate their capabilities using all components and protection layers.
