

No. 103543

CERTIFICATE

TESTED SOFTWARE

INTERNET SECURITY

COMPANY

F-SECURE

Version Tested

2010 and 2011

Platform

Windows XP (SP3, 32 bit)

During July, August and September 2010 we continuously evaluated 19 security products using their default settings. We always used the most current publicly-available version of all products for the testing. They were allowed to update themselves at any time and query their in-the-cloud services. We focused on realistic test scenarios and challenged the products against real-world threats. Products had to demonstrate their capabilities using all components and protection layers.

TEST Q3/2010

PROTECTION

Protection against malware infections
(such as viruses, worms or Trojan Horses)

PROTECTION SCORE:  5.0/6.0

REPAIR

Cleaning and repair of a
malware-infected computer
