

CERTIFICATE

Tested Software

**Antivirus for Mac**

Company

**Bitdefender**

Version Tested  
**3.3 & 4.0**

During the year 2015 home user and corporate endpoint protection products were continuously evaluated in 2 certification tests using their default settings. We always used the most current publicly-available version of all products for the testing. They were allowed to update themselves at any time and query their in-the-cloud services. We focused on malware detection and usability, including performance and false positives. Products had to demonstrate their capabilities using all components and protection layers.

Magdeburg, 17th February 2016
