

# Network Threat Protection – tested and certified by AV-TEST

The security seal for your network solution

## Certified powerful, made impenetrable

Corporate networks are under constant fire from sophisticated threats. As a manufacturer of DNS, SWG, VPN and router solutions, you always need up-to-date and certified assurance that your solutions can withstand these attacks.

This is where AV-TEST, the leading institute for independent testing and evaluation of security solutions, comes in. We expand our tried-and-trusted test procedures and evaluate your DNS, SWG, VPN and router solutions by means of rigorous test procedures and realistic attack scenarios. The result: targeted consulting, clear steps towards improving your products, along with certification, which provides for transparency and communicates your security standards to customers.

- Comprehensive threat detection: Tests for detection of malicious URLs and DNS as well as VPN tunneling attacks.
- Realistic environment: Current URL database with live streaming on the simulation of actual threats.
- Precise reports: Detailed insights and clear recommendations for steps to be taken.

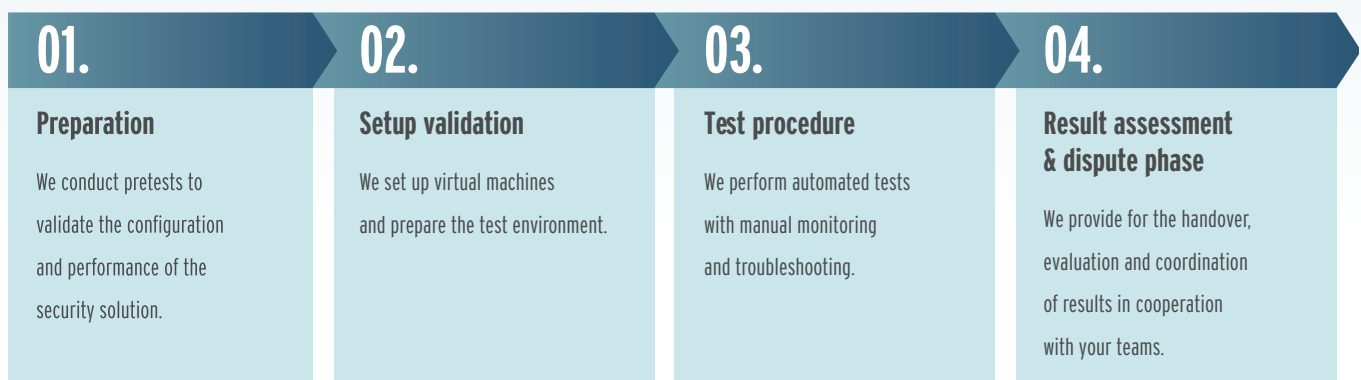

## From the barn door to Fort Knox

### Teaming up with AV-TEST against 9 million threats per month

Network solutions are under a constant barrage - from DNS spoofing to DDos attacks and right through to classic malware infections. Modern hybrid companies are especially subject to these risks on an ongoing basis. At AV-TEST, we check 5 million URLs per week for malware content and identify 3-4 new threats per second (see AV-ATLAS).

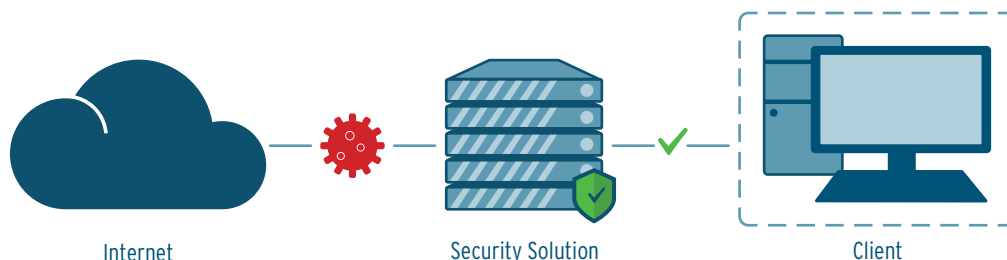

Therefore, each link in the network chain has to withstand the increasing cyberattacks, from SASE to the router solution. In this, we support manufacturers with targeted security checks in the following areas:

### 360° security check for your network solution

With test procedures from AV-TEST, you can be sure that your DNS, VPN, Secure Web Gateway and router products comply with the highest security standards and effectively fend off threats. Contact us now for a 360° evaluation, and you'll receive your seal accordingly after successful completion of the tests.

- Exact analysis and reporting: We offer you detailed reports for in-depth insights into the performance capabilities of your security products, with clear solutions.
- Renowned AV-TEST seal: You'll receive detection rates that can be clearly stated and communicated along with the presentation of our AV-TEST seal.
