

# Single Product Test of ThreatTrack Vipre Internet Security Pro 9.3

Date of the report: February 1<sup>st</sup>, 2016

AV-TEST privately evaluated ThreatTrack's VIPRE Internet Security Pro (9.3.0.85) in January 2016. Not yet publicly available, the test was commissioned by ThreatTrack to evaluate improvements introduced with the implementation of a new scanning engine. This document contains the results of how VIPRE Internet Security Pro (9.3.0.85) performed in our Real World test in comparison to VIPRE Internet Security (9.01.4), which used the existing configuration and scan engine. The test was performed with 75 live and malicious websites.

*January 2016 test results for ThreatTrack Vipre Internet Security 9.0.1.4 and ThreatTrack Vipre Internet Security Pro 9.3.0.85.*

Time of Testing: January 2016
