

Data is King!

AV-TEST FLARE Clean File Feeds

Access the latest and historical software installers, including all associated files used by end users worldwide on their PC, MacOS or Android devices. Take advantage of downloadable URLs, description, file name, type and others.

Profit from the largest collection of installers, DLLs, audio/video files with metadata worldwide. Our data covers 7 languages and 8 countries. Get access to complete version history of software products, unusual versions (e.g., from Russian websites) and an archive of sample versions no longer available elsewhere! Have access to vulnerable/hacked files that should be clean.

Minimize and prevent false alarms

**Receive daily reports
for your security experts**

**Reduce support costs and
improve customer experience**
