

Data is King!

AV-TEST Malware Feeds

Use AV-TEST's various sources and get daily updates on the latest malicious attacks on Windows, MacOS and Android. Gain an advantage with our institute's own analysis systems.

 <p>Malicious URLs Feed Get thousands of URLs per day where we have recently found a malware during the process of the payload. You get our categorization of the payload not the payload itself.</p>	<p>Your key advantages</p> <ul style="list-style-type: none"> • New daily categorized URLs • Use it for firewall and safe-browsing tests • Download the payload by yourself for further processing
 <p>Malicious E-Mails and attachments Feed Get the complete EML with its malicious attachments, text and contained URLs. Access to subject, involved addresses, keywords and our categorization.</p>	<p>Unlock your benefits</p> <ul style="list-style-type: none"> • AV-TEST has its own sources like honey pots • JSON file contains data for quick processing
 <p>MacOS PUA and Malware Feed Get up to 50 of the most suspicious MacOS samples we have recently found per day. Filter all the samples your scanner has already detected to get only the most relevant ones.</p>	<p>What you gain</p> <ul style="list-style-type: none"> • Malware name & category per sample • Daily new MacOS findings
 <p>Android Malware Feed Get up to 10 GB of the most suspicious APKs we have recently found per day. Filter all the samples your scanner has already detected to get only the most relevant ones.</p>	<p>Designed to give you more</p> <ul style="list-style-type: none"> • Improve your Android AV-scanners • Pre-filtering possible
